

Immersion 2012

Fast-paced language learning

An intensive immersion in the target language

Our immersion-styled training forms the most efficient method of learning a foreign language. The course participant plunges into and is immersed in the target language for the entire day and hears, thinks and speaks in it. This happens from morning till evening and even during the breaks and over lunch.

The advantages

- the fastest learning outcome through the highest intensity
- an entire day spent in the company of a qualified teaching team consisting of native speakers
- an intensive exposure to the (business) culture of your target language
- the simulation of a business work day eases turning your knowledge to working practice
- custom made adjustments to real-life working needs is possible

Individualised course content

The following courses are available:

- **General language skills immersion course:**
A programme with general language skills forming the main content. This could consist, for instance, of a mixture of conversation, reading comprehension, general vocabulary, grammar and writing.
- **Business and diploma immersion courses:**
A broad range of business-related themes such as finance, human resources, customer support, production, and insurance for example. In addition to this, we could prepare you to take exams for an internationally recognized language diploma if you so desired.
- **Executive immersion courses:**
An individually designed programme for executives who need to perform well linguistically. The goal would be to implement what is learnt directly into practice. Examples of this are handling negotiations, giving presentations or lectures and conducting meetings. Course materials would consist of your own company documents.
